Acelera

Iván Yarur
Transformation Director

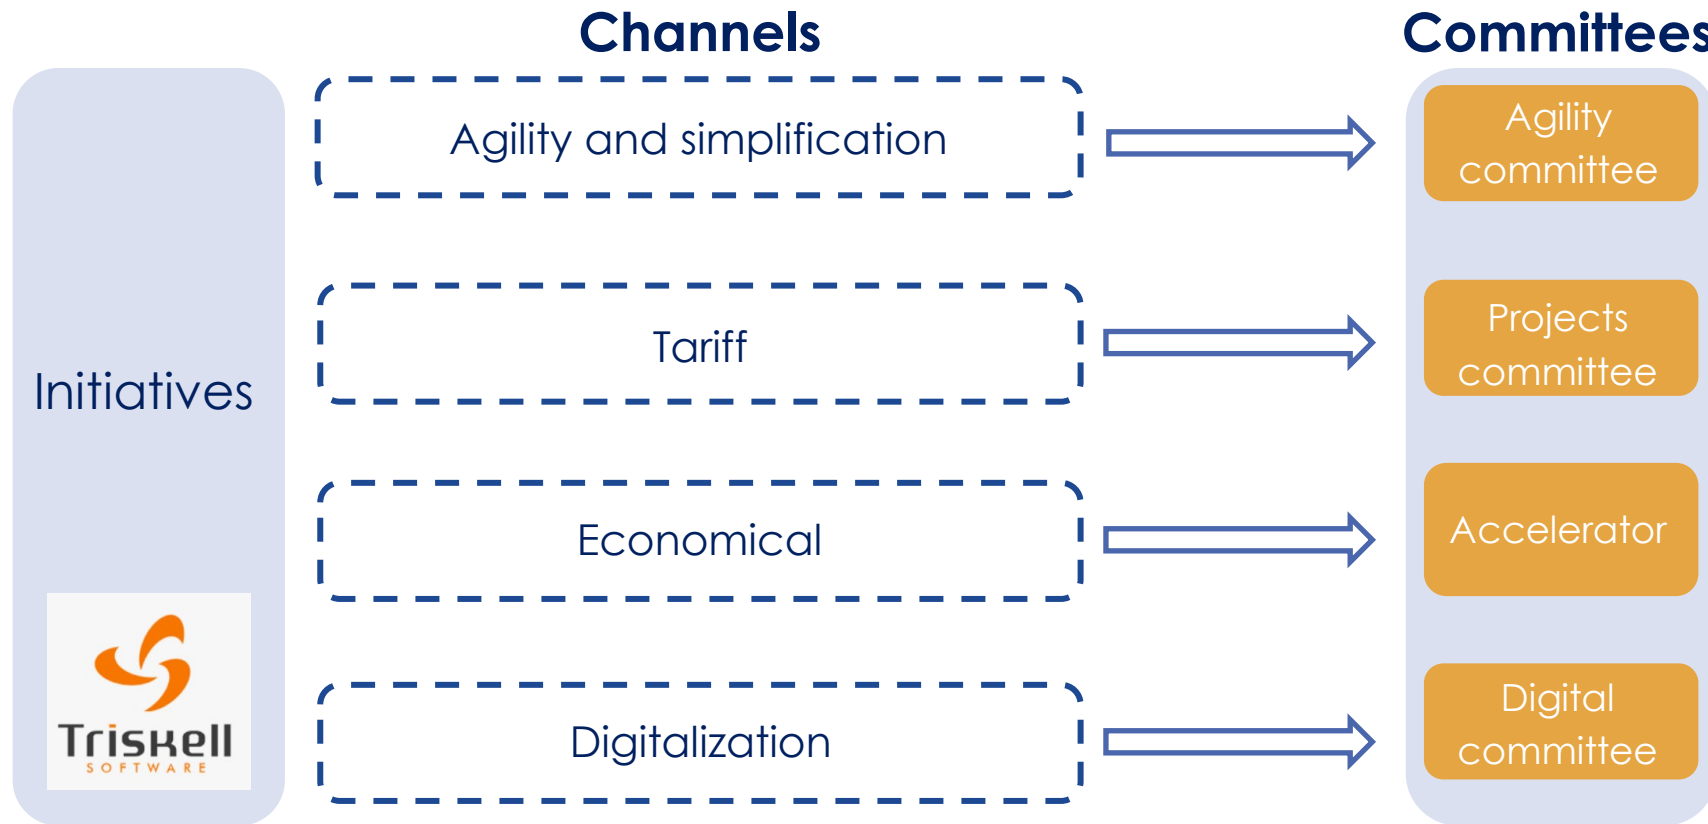

It is the Company's transformation plan. It seeks to develop initiatives to fulfill our corporate purpose, in particular:

- Increase our **financial sustainability**
- Going deeper with the **digitalization** of our activities
- Increase our operational and administrative **agility**

Acelera Ventures

Acelera Ventures follows a double funnel process to turn ideas into projects and then execute the projects with the assigned resources.

The process is carried out by a dedicated professional team and an internal decision-making committee.

Renovation of microcracking water connections

**Making the
renovation of
water
connections in
the Territories
more efficient
thanks to the
expansion of the
microcracking
technique**

Capacity works for third parties

PLAN DE TRANSFORMACIÓN ACELERA

Esta iniciativa se llama
"Obras de Capacidad para Terceros".

Construction of key sanitation works such as wells, reservoirs, and pumping stations for third parties, generating additional revenue for the company.

Adaptation of connections to migrate to free client

Reduce operating costs related to energy consumption given the opportunity to switch to a free customer.

Free customer: Has the freedom to directly negotiate the price and conditions of their electricity supply with different generation or supply companies.

Previous limit
500 kW

New limit
300 kW

Potential benefits of the new regulation

- Promotes more competition and innovation in the electricity market
- Access to more competitive tariffs
- Significant savings in operating costs
- Promotes sustainability and renewable energy

A shared purpose

Circular Economy

Miquel Sans
Financial Director
